

QUALITY POLICY

KASKTAŞ is committed to conduct all geotechnical and foundation engineering works in compliance with legal requirements, national/international standards, customer demands and expectations and allocate needed resources to perform all activities in an optimal way on basis of zero-tolerance philosophy in health, safety and environmental issues provided that employees are aware of importance of all these.

The main objective of KASKTAŞ is to maintain customer confidence developed by its product and services giving his name to quality since its establishment. KASKTAŞ, in accordance with this objective, performs in favour of "continual development" at national and international levels with regard to customer satisfaction and aims to:

- act as per general and professional ethics
- utilize the most recent and valid method, technology and information systems
- plan and perform activities on basis of customer-focused approach and complete projects on-time, within expected quality and budget limits
- enhance quality at all times by efficient risk management, measurement and monitoring activities
- perform effective work under cooperation and coordination with subcontractors and suppliers
- invest in man-power by means of training and awareness activities and
- work with investigative, innovative and progressive team spirit

KASKTAŞ is committed to improve its quality management system continually established in the light of all these objectives and targets.
